

Can you spot the wind?

We cannot see air.
What could give it away?

GUESS BEFORE YOU SWIPE

Hang or flutter?

Hold one end of a paper strip.
What might a breeze do?

Make a guess.
Then go outside.

LET'S TRY IT

First, hold still.

In a calm spot, Gina's strip hangs.
She keeps her hoof still.

Watch the loose end.

LOOK AGAIN

Then comes a breeze.

The same strip lifts and flutters.
Gina's hoof stays still.

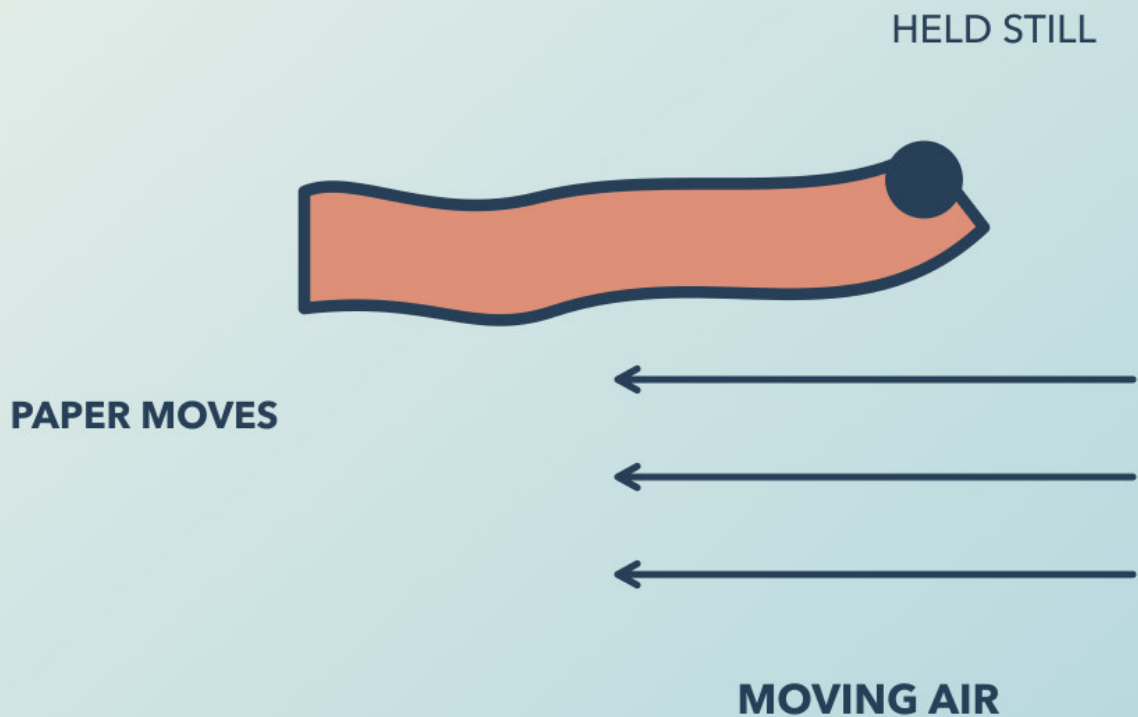

Moving air is pushing the paper.

THE PART TO REMEMBER

Wind is moving air.

We can spot what it moves:
paper, leaves and grass.

Arrows show air movement

The moving paper is a clue.

TRY IT TOGETHER

Be a wind watcher.

With an adult: one short paper strip and a safe outdoor spot.

- 1** Adult tears a short paper strip. Hold one end away from your face.
- 2** Keep your hand still outside. Watch calm air, then a breeze.
- 3** Point, say or draw the change. No breeze? Try another day.

What else moves when a breeze comes?

Adult stays close. Skip stormy weather.
Hold the strip; bring it back inside.

KEEP EXPLORING TOGETHER

Keep watching the sky.
