

GINA & OLLIE EXPLORE

LIGHT IN THE OCEAN

The deeper we go, the less sunlight reaches us.

SUNLIT ZONE

Most sunlight is near the surface.
Algae use light to make food.

Surface

LOOK & WONDER

Which zone has
the most light?

Depths are approximate.
Picture not to scale.

TWILIGHT ZONE

Only faint sunlight reaches here.

About 200 m

DARK ZONE

No sunlight reaches here.
Some animals make their own light.

About 1,000 m
