

1 SEED
A seed holds a tiny plant.

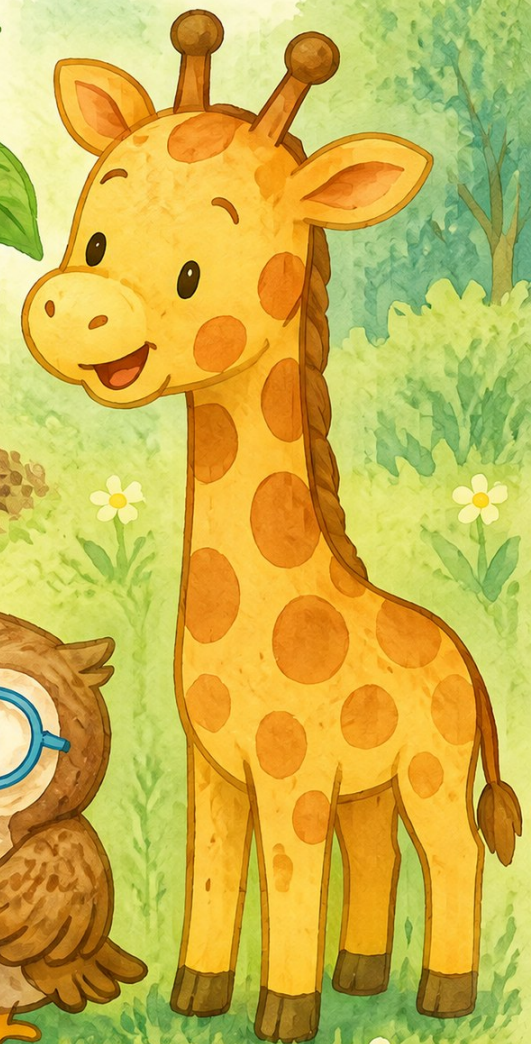

2 GERMINATION
With water, air and the right warmth, a seed can start to grow.

3 SEEDLING
Roots grow down.
A shoot grows up.

4 ADULT PLANT
The plant grows more leaves.

GINA & OLLIE EXPLORE
A PLANT'S LIFE CYCLE
A flowering plant grows, makes seeds, and begins again.

FOLLOW THE GROWTH

Start with the seed. Tell what happens next.

5 FLOWERS
Flowers can form fruits or pods.

6 NEW SEEDS
Seeds inside the pod can grow into new plants.

A simple life cycle of a flowering plant.
