

1 SEED

A seed holds a tiny plant.

2 GERMINATION

With water, air and the right warmth, a seed can start to grow.

3 SEEDLING

Roots grow down. A shoot grows up.

4 ADULT PLANT

The plant grows more leaves.

6 NEW SEEDS

Seeds inside the pod can grow into new plants.

GINA & OLLIE EXPLORE A PLANT'S LIFE CYCLE

A flowering plant grows, makes seeds, and begins again.

FOLLOW THE GROWTH

Start with the seed. Tell what happens next.

5 FLOWERS

Flowers can form fruits or pods.

A simple life cycle of a flowering plant.
