

GINA & OLLIE EXPLORE

SINK OR FLOAT?

Water pushes up on objects.

FLOAT

The cork stays at the surface.

SINK

The steel spoon rests on the bottom.

TRY IT

With a grown-up, guess and test safe objects in a shallow bowl.

What happens?

Size alone does not tell us what will float.

Use an unbreakable bowl and large objects. Keep objects out of mouths. A grown-up stays beside you and empties the water afterward.
